

# Mr. Scandrett's STEAM Website Scavenger Hunt

*Answer Key* · Website: [MrScandrett.Github.io](https://MrScandrett.Github.io)

**Use:** Questions 1–8 are required. Questions 9–10 are bonus. The extra-credit reflection is open-ended and does not need a fixed key.

**1. Open "Newton's Laws of Motion." Under "Real-World Examples of the Second Law," what are the 3 examples shown?**

**Answer:** Kicking a Ball, Rocket Launch, Cycling.

**2. Open "Periodic Table of Elements." Which halogen is found at the bottom of the halogen group, and what U.S. state is it named after?**

**Answer:** Tennessine; Tennessee.

**3. Open "Types of Cells." What 3 main cell types are students asked to compare in this lesson?**

**Answer:** Bacterial cells, plant cells, and animal cells.

**4. Open "Volcano Simulator." Which Icelandic volcano says its ash cloud grounded 100,000 flights across Europe for 6 days?**

**Answer:** Eyjafjallajökull.

**5. Open "Mechanisms and Gear Systems." Set the "Driver gear" to 12T and the "Driven gear" to 36T. Then click "Engage motor." What happens?**

**Answer:** Lift. With a 3.00: 1 reduction, the setup is lift-capable.

**6. Open "Archimedes' Principle." In the "Choose an Object" area, find the two objects with a density of 2.7 g/cm<sup>3</sup>.**

**Answer:** Granite rock and aluminum.

**7. Still in "Archimedes' Principle," choose "Foil Ball" and click "Drop it in >". Based on what happens, does the foil ball behave more like a solid piece of aluminum or a hollow boat?**

**Answer:** A hollow boat.

**8. Open "Event Horizon Telescope." Click "Select all." Make sure "Sync Status" says "Correlated." Then click "Clock sync ON" once to turn synchronization off. Part A: What exact word replaces "Correlated" under "Sync Status"? Part B: What happens in the "Reconstruction Preview"?**

**Answer:** Part A: "Uncorrelated." Part B: The ring no longer reconstructs cleanly; it becomes unclear / not clean because the recordings are unsynchronized.

**9. Bonus: Open "Climate Modeling Simulator." Click the "Carbon" tab. Then move the "Deforestation" slider from "0% pristine" to "100% barren." What happens to the carbon particles?**

**Answer:** They move up into the atmosphere.

**10. Bonus: Open "Searching for Extraterrestrial Intelligence." Click "Arecibo Message." Which part of the message represents the Solar System?**

**Answer:** Rows 55–59 represent the Solar System.

## Extra-Credit Reflection

EC. What bugs did you notice throughout the website?

EC. What would you like to add?

EC. Can you bring your ideas to life? **Answer:**
